

Fewer tasks. More time.

Practical automations and integrations that connect tools and reduce manual work.

From

€100 + VAT

Defined-scope solutions without complex development. A tailored quote is provided before work starts; licences and external services are excluded.

Payment: 50% at the start and 50% on delivery. Timeline: 3–7 working days for simple workflows, subject to the quote.

What a simple automation includes

One defined workflow	One trigger and up to two consecutive actions, without complex branches.
Tools	Up to two tools with existing connectors and access supplied by you.
Setup	Connection, basic configuration and tests of the agreed behaviour.
Review	One round of minor adjustments to the agreed workflow.
Handover	A short explanation of how it works and basic documentation.
Technical warranty	15 days to correct implementation defects; changes to external services are excluded.

Small changes. Useful results.

Examples and indicative starting prices, subject to requirements and compatibility.

SERVICE	SCOPE	PRICE
Form → email	Automatic alert when an enquiry arrives.	From €100
Form → spreadsheet	Store data in Google Sheets or another compatible tool.	From €100
Order → notification	Internal alert when a sale or order is received.	From €100
Scheduled reminders	Periodic messages based on defined dates or events.	From €100
Form → CRM	Create a contact in a CRM with an available integration.	From €150
Form → CRM + alert	Create a contact and notify the team.	From €150
Tool integration	Scoped data synchronisation between two applications.	From €200
Multi-step workflow	Validations, conditions or several linked actions.	From €350

The final price depends on credentials, API limits, data quality, usage volume and required testing. We cannot guarantee that every system supports the requested integration.

Every workflow, well defined.

A simple automation should be easy to implement, test and maintain.

Basic service	1 trigger, up to 2 actions, no more than 2 tools and no custom API programming.
Outside the basic scope	Multiple branches, complex rules, custom databases, AI, advanced processing and custom dashboards.
Custom projects	Custom API, backend or AI integrations require an initial assessment and bespoke quote.
Internal estimate	Services starting at €100 are intended for predictable work of approximately 1–2 hours. This is not a commitment of hours.
External dependencies	You retain your accounts and permissions. Licences, hosting, automation services, APIs and usage fees are paid separately.
Security and data	We agree minimum access and data handling before connecting systems; additional terms may be needed.
Later changes	New features, tools or workflow changes are quoted separately.

From manual to automatic.

A clear process for bringing each integration into use.

01 / Discovery	We identify the repetitive task, tools involved and desired result.
02 / Proposal	We define the trigger, actions, fields, exceptions and a fixed price for that scope.
03 / Implementation	We configure the workflow and test it with representative examples.
04 / Handover	Activation, usage guidance and one round of minor adjustments.

After delivery

Optional support	Monitoring, incident resolution and periodic changes are quoted for each workflow.
Third-party services	If a provider changes its API, permissions or rates, adaptation may require an additional quote.
Without maintenance	The automation may continue running, but ongoing monitoring and guaranteed permanent availability are excluded.

Informative catalogue. Prices exclude VAT. The accepted quote and contract set the definitive scope, schedule, payments, responsibilities and terms.

Every adjustment in its place.

How the included round of adjustments works for each automation.

What counts as a round	One consolidated list of changes, sent together. Anything sent afterwards counts towards the next round.
Minor adjustment	Changes to the agreed workflow, such as fields, notification text or conditions already envisaged. New tools, actions or workflow changes are quoted separately.
Response time	You have 5 working days after delivery to submit your adjustments. If you do not respond in that time, the workflow is deemed approved or the schedule is revised, as agreed in the quote.
Additional adjustments	The included round covers minor adjustments to the agreed workflow. Later changes are quoted separately.

Definitive terms are set out in the accepted quote and contract.
